

## **OSHER@Dartmouth Equipment**

The items included in this list are owned by Osher at Dartmouth. Availability is limited in some cases, which is why we ask for your equipment needs on our course proposal forms.

### **Slide Projector**

You must provide your own slides.

Two units available. Loan available for locations other than DOC House. (Image at left is an example - actual models may differ.)

### **LCD Projector**

For use with almost any electronic file or media format you plan to utilize in class. The LCD is necessary if you intend to show movies via Blu-Ray, DVD, or VHS; PowerPoint presentations from your laptop; use the document camera; etc. We provide the necessary connection cables, but you will need to let the office know what type of laptop you plan to use and what connection is required. (VGA, headphone port, HDMI, etc.)

Several LCD units available. DOC House classrooms have projection screens. Off-site locations may have projectors and screens available; if not, a loan can be arranged.

### **Document Camera**

The document camera is capable of magnifying and projecting any image or object placed on the bed of the projector. When connected to the LCD projector, the item shown on the projector bed becomes visible to the entire class. Particularly helpful if you wish to share a document or object that you do not want to pass around or risk damaging.

Only one unit available. Connections provided, and LCD must be reserved for use along with the document camera.

## OSHER@Dartmouth Equipment, cont.

### Overhead Projector

For use with transparencies. Cannot project opaque items or 3-dimensional objects.

One unit available. Office can help produce transparencies for use with the projector; advance notice required.

### Table-Top Lectern

Several units available at DOC House. Osher-owned units are not normally used off-site; some off-site locations may have one available.

Please note that our lecterns are not equipped with voice amplification equipment; they are strictly a wooden stand designed to hold documents or to rest your laptop or tablet.

### Blu-Ray/DVD/VHS Player

Blu-Ray Player (top image) is available only at the DOC House. Off-site locations may have one available - please check with the office if you'll need this equipment. Osher-owned Blu-Ray players are capable of playing both Blu-Ray and DVD discs.

Osher has one single VHS unit (bottom image) available for use at the DOC House.

LCD projector is required for use with both the Blu-Ray and DVD/VHS players.

## OSHER@Dartmouth Equipment, cont.

### CD/Cassette Player

One unit available. Capable of playing both CDs and audio cassette tapes.

### Easel w/Paper

DOC House classrooms will automatically include an easel similar to the one seen here. Off-site locations may not offer easels; check with the office to discuss options.

### Map Display Board

A cloth-covered board for use at the DOC House. Only one available. Push-pins supplied by Osher.
